

BIOLOGICAL SEX

It refers to the genital organs, chromosomes, reproductive gonads and secondary sexual characters.

At birth you are assigned a gender (male or female) based on your genitals.

Letter I from LGTBI * means intersex people, those who have male and female sexual characteristics.

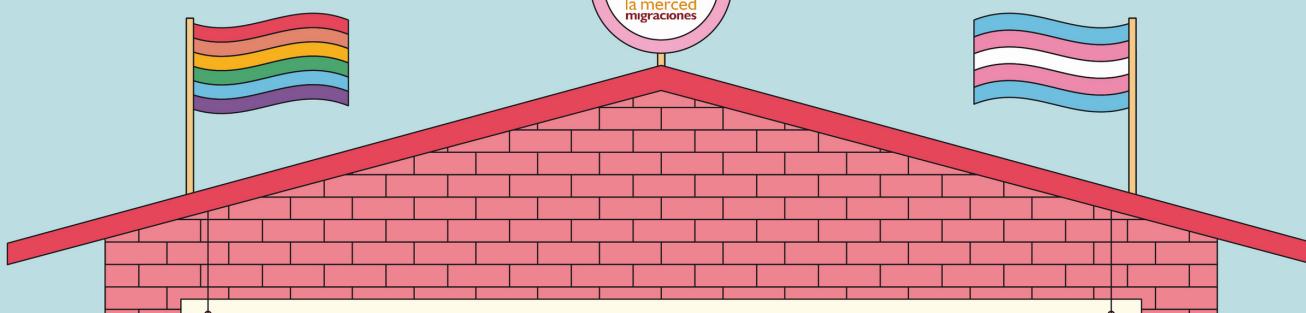

GENDER IDENTITY

It's how each person feels in relation to gender. It may or may not correspond to the gender assigned at birth.

Cisgender: Someone who feels identified with the gender assigned at birth.

Trans: That person who does not feel identified with the gender assigned at birth

Non-binary: That person who does not feel male or female.

SEXUAL ORIENTATION

The capacity of each person to have an emotional, affective and sexual attraction to another person.

Homosexual: someone who feels attraction to people of the same gender. Men are gay and women are lesbians.

Straight: someone who feels attraction to people of the opposite gender.

Bisexual: someone who attraction to people of any gender.

GENDER EXPRESSION

The way each person chooses how to express themselves through gender roles (clothing, behavior, attitude, communication, expression ...).

You can have a male, female, androgynous (female and male characteristics) or non-binary gender expression.

GRUPO LGTBI+

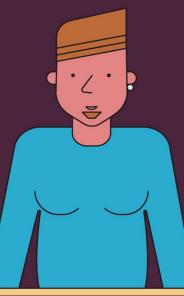

Un espacio semanal donde poder expresarse libremente, informarse y conocer a otras personas que han pasado por esta situación y crear red.
